WORK EXPERIENCE

INTERNSHIP

AXIANS ICT, VIENNA

JULY 2023 – AUGUST 2023

As part of my regular tasks, I evaluated an open-source chat software ("Rocket.chat") and created a proof-of-concept implementation using C#.

As part of the "Summer of Innovation" program I developed two internal Apps with MS PowerApps. I was responsible for project management and technical implementation of both projects.

VOLUNTEER

ATLANTIC WHALE AND DOLPHIN FOUNDATION, TENERIFE

OCTOBER 2020 – JULY 2021

As the only person interested in tech, I gradually became responsible for "everything IT-related". I ended up leading teams of 2-3 international volunteers on different tech-projects.

Main work included development of a mobile app, website maintenance, on-site networking, IT-Job recruiting, hardware acquisition, database management and full-stack application development in JavaScript and AppsScript.

Other work included cetacean data-gathering on research ships, settling in new volunteers, renovating old farms, dog walking and beach-plastic research.

INTERNSHIP

SIEMENS AG, VIENNA

AUGUST 2019

I worked at Siemens for a summer internship. I mainly did database cleanup work. I also helped automate SQL data entry for common queries, so future interns don't have to do it manually 😊

INTERNSHIP

BRÜDER GROS ELEKTRIKER, VIENNA

JUNE 2017

I had the opportunity to get an insight into all areas of the company.

I helped their secretary with bookkeeping, I worked in the archives, I helped sort the warehouse and I accompanied electricians for a week.
